

Hi, we are the students from class 5A of the "Fattibello" Primary School in Comacchio; we are a class of 19 students: 10 boys and 9 girls.

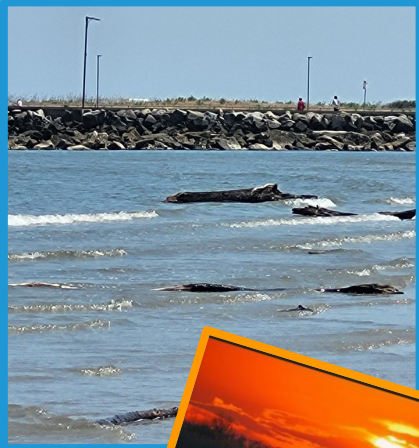

Comacchio is a beautiful historic town in Northern Italy, it is located in the famous Delta of the Po river, on the coast of Adriatic Sea; it is called "Little Venice" because it is built on 13 little islands connected by bridges and canals.

The town is also famous for its monuments: Trepponti Bridge, the Cathedral of Saint Cassiano, the Loggiato of Cappuccini, Bellini Palace, the Old Hospital (now the Ancient Delta Museum), the Etruscan archaeological excavations of "Spina" and the ancient saltwork.

In the beautiful Comacchio Valleys you can observe fish, rare birds, like the famous pink flamingos and the famous Comacchio eels.

Sea, lagoon, valleys, sunsets...

*... birds, flowers,
wood:*

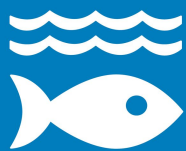

*that is what can you see all
around our town.*

...but our beauties are in danger.

So we want to take actions to reach the global goals and protect our environment

conserve and sustainably use the ocean , seas and marine resources for sustainable development.

TO DO THINGS :

1. Do not flush paint, engine oil, cleaning solvents, ammonia, pool chemicals, and medications down the sink or toilet.

2. Use biologically degradable detergents, keeping the dosage as low as possible.

3. Avoid plastic waste and water consumption.

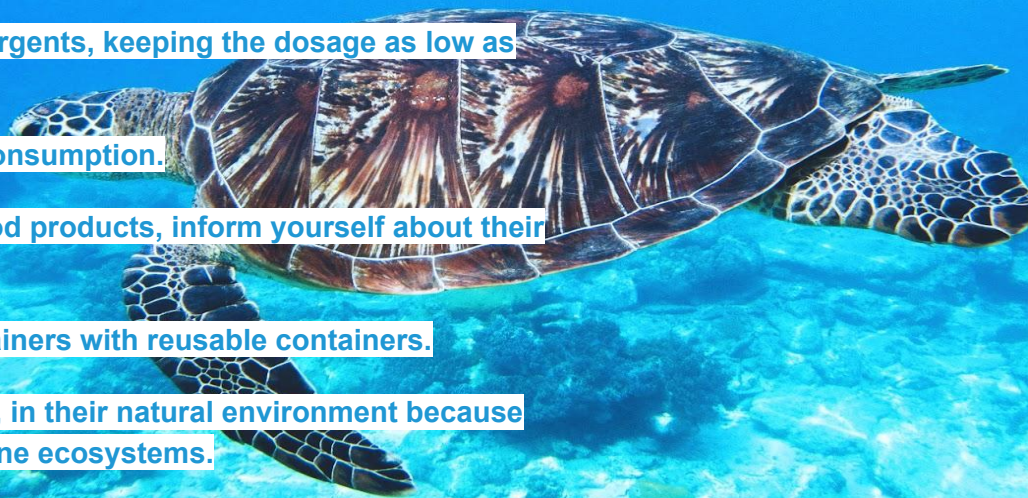

4. Buy safe and sustainable seafood products, inform yourself about their origin.

5. Replace single-use plastic containers with reusable containers.

6. Leave sea shells where they are, in their natural environment because they play an important role in marine ecosystems.

7. Support those who defend the environment and the sea.

8. Learn about the sea, its resources, its beauty, its variety and the problems that man causes and talk about it with others!

Help me!

I'm in danger.
Make your voice heard!

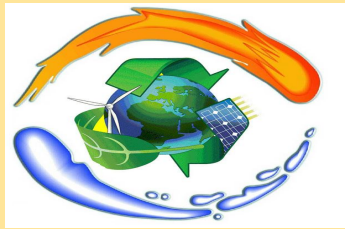

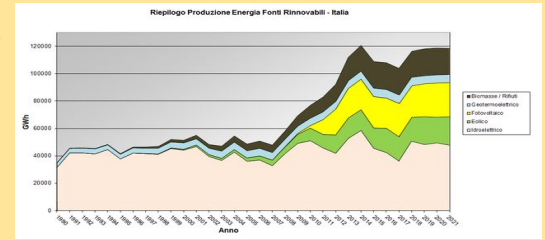

Achille, Isabel and Ginevra

7 AFFORDABLE AND CLEAN ENERGY

Ensure access to affordable, reliable, sustainable and modern energy for all.

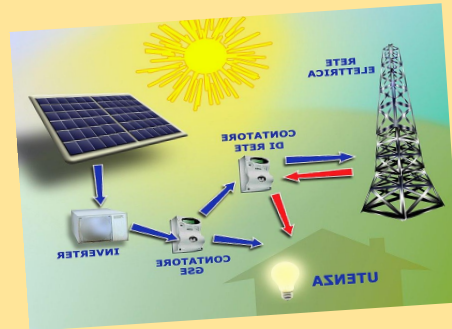

- *Switch off the electric appliances when possible.*
- *Recycle light bulbs,*
- *Recycle batteries .*
- *replace light bulbs with LEDs*

FIRST STEPS INTO ENERGY!..

Reducing energy consumption means turning off electronic devices when they are not in use, drying clothes outdoors so as not to use the washing machine. It would also be better to use energy saving light bulbs

Alena, Daniel and Noelia

1 NO POVERTY

end poverty in all its forms everywhere

We choose this goal because we hate seeing people suffer because they don't have money to live in a healthy way and can't maintain their family or sons

Nicòlò, Noa, Pietro

vote for us if you want a world with a more right and better economy for everybody.

To defeat poverty we have to:

- be instructed,
- support gender equality,
- involve everybody,
- re-distribute resources,
- waste less and produce more.
- to fight the lack of food in small cities that produce less compared to big cities.
- create international laws,
- invest in cultivation systems,
- respect the ECO-SISTEM.

what can you do to try defeating poverty?

to defeat poverty we can donate our old clothes that don't fit us anymore, we gift our old toys that we don't use anymore, gift our old shoes, help people in need giving them some money and even if it's not much for them it could change their day.

ensure availability and sustainable management of water and sanitation for all.

1 wash the dishes with the pasta cooking water, it is a degreaser.

2 plant succulent plants in your garden because this way you save water.

3. use washing machines and dishwashers only with full loads

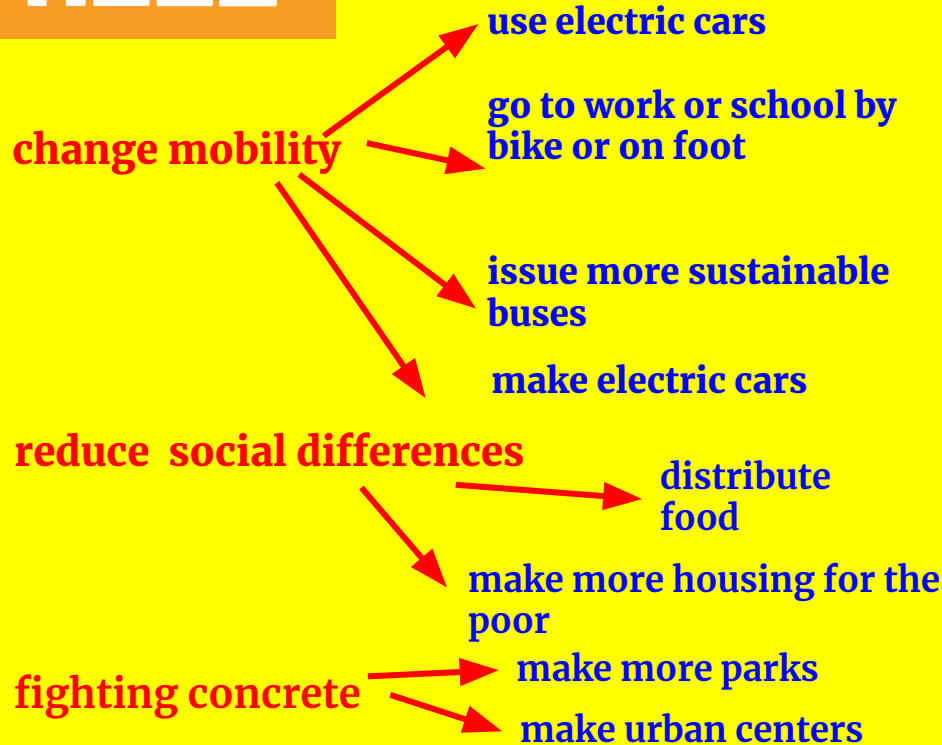

don't wast water, it's a precious resource !!!!

Samuele, Giulia and Melania

Make cities and human settlements inclusive ,safe,resilient and sustainable.

Renato, Christian Matteo and Leo

ENSURE SUSTAINABLE CONSUMPTION AND PRODUCTION PATTERNS

- don't waste food:
- reuse leftover
- when you eat in a restaurant ask for a doggy bag i.e. put the leftover food in a tray.
- give a new life to abandoned objects
- turn old shirts into new dresses

**we have to
improve
the world!**

- repair electronic devices instead of throwing them away and buying new ones

Carlotta, Viola, Francesco
