

Hi friends! We are the student of class 5^C of the primary school
"Fattibello" in Comacchio.

In our class there are 10 boy and 9 girls.

Comacchio is the North East of Italy on the Adriatic Coast, among the
valleys.

.The name Comacchio comes from the latin word "Comacleum" that
means "small boat" or "small wave".

In Comacchio here are several bridges, canals and a valleys.
There is also the Delta Antico Museum.

In the valleys you can find different types of birds and fishes, for examples
flamingos and eels.

our beautiful landscapes

our environment is in danger

dead fish

sunken boat

gas

sea pollution

LET'S TAKE ACTIONS FOR OUR PLANET

Raja, Ginevra and Elena

The underground pipelines if worn they in break and release dangerous or toxic substaces into the ground whith attack the underlyng aquifer.

Pesticide and other chemicals used in soil and turn into pollutants.

*The earth does not belong to man,
it is man who belongs to the earth*

WHAT CAN WE DO?

- 1)** Choose reusable biodegradable fabric or paper bags.
- 2)** Prefer glass to plastic.
- 3)** Purchase products grown or raised without the use of chemicals.
- 4)** When it is possible, grow a vegetable garden.

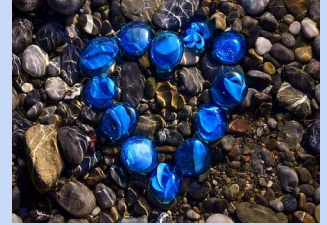

conserve and sustainably use the ocean , seas and marine resources for sustainable development

Together we can save the marine habitat ;
two important things to do are
not to throw plastic into the sea and collect trash on the beach

Concrete things to do:

- do not throw waste paper on the seashore
- if you find paper while swimming in the sea, collect it
- if you find marine animals on the shore, help them return to the water

- Don't throw cigarette butts on the beach
- encourage others not to pollute because many animals die because of humans
- use less plastic but more paper to avoid polluting

**the sea has a heart,
help it as you would like to be helped**

Emily, Alexis and Lorelai

**our planet needs
to be
safeguarded and
protected**

**ensure
access to
affordable,
reliable ,
sustainable
and modern
energy for all.**

**An important message for you!
energy is an important resource
let's not waste it!**

**let's light up the planet
with our good actions**

5 TIPS to safe Energy:

- 1) Turn off your devices when you go to sleep
- 2) Turn off the light when you are not in that room
- 3) Use led bulbs
- 4) Keep the temperature in your home low
- 5) Install solar panels

12 RESPONSIBLE
CONSUMPTION
AND PRODUCTION

Ensure sustainable consumption and production patterns:

These are some things to do

- 1) use less water
- 2) reuse used items
- 3) conserve food with care
- 4) keep the ground and water clean
- 5) Choose “ugly but good” fruit and vegetables
- 6) Buy fair trade products

If you feel
responsible, you
are in the team!

these are some examples to follow to start to improve the world, obviously in small steps. If we don't start right now our planet will rebel, especially with atmospheric events.

Reduce, reuse,
repair and
recycle.

take urgent action to combat climate change and its
impacts

13 CLIMATE
ACTION

- You need to plant more trees.
- Use means of transport such as bicycles
- Recycle and manage waste.

Lucrezia, Mike, Ianis and Federico Z.

SUSTAINABLE CITIES AND COMMUNITIES

- Reduce water consumption (use only what is necessary)
- Move as much as possible on foot or by bike or by public means of transport
- Do not waste electricity (unplug unused appliances)
- Consume less meat and fish (eat fruit, vegetables and vegetable proteins)
- Recycle more to produce less
- Choose organic products at 0 km
- To clean the house use organic products (such as water and vinegar)
- optimize the heating/cooling system (choose efficient boilers)
- Use the green cars
- Use solar panel

***Let's support our
land for
a better
life***
